

A **PhD position** is available at the **Laboratory for Innate Cellular Immunology, Department of Internal Medicine I, University of Bonn Medical School, Germany.**

Our group (<http://www.bonn-innere1.de/ag-nattermann.html>) performs translational immunological research studying compartment-specific characteristics of human innate lymphoid cells (ILCs).

The current project relates to the interplay between the intestinal microbiome and ILCs in the context of hereditary cancer syndromes.

The position starts immediately and is for a period of 3 years, with the possibility of an extension.

The ideal candidate will be a highly motivated, team-oriented graduate with a strong interest in cellular immunology and microbiome studies. Experience with flow cytometry, microbiome analysis, and/ or molecular biology techniques is advantageous. Candidates should hold a diploma or a master's degree in biology, molecular biology, biomedicine, or a related subject.

We offer supportive mentoring and a well-equipped laboratory. Successful candidates will be awarded a PhD.

The position will be a 65% full time equivalent. Salary will be according to the German salary scale TV-L E13.

The University of Bonn is an equal opportunities employer.

Questions concerning the project can be addressed to Prof. Jacob Nattermann. Interested candidates should apply via email with letter of motivation, CV, certificates and recommendation letters.

Please send your application as a single PDF.
